NARROW GAUGE RAILWAY AT THE HORTOBÁGY-HALASTÓ FISHPONDS!

Hortobágy-halastavi Kisvasút

Lots of birds, protected plants and grazing or wallowing buffaloes are waiting for those visitors who are travelling by the narrow gauge railway at the Hortobágy Great Fishponds. The train runs on a 5 km distance between the fishponds on the inner dike making it possible to easily reach the distant parts of the fishponds as well. There are excellent opportunities for walking and biking in the nearly 2000 hectare sized fishpond system. Bird-watching towers, information boards and a wooden path assist the visitors. The fishpond area is internationally protected and it is one of the most well-known and famous wetland bird habitats. The outstanding aquatic birdlife provides attractions for all seasons for both beginner and advanced birders. The most spectacular period of the year is the autumn migration of cranes: in October up to 30-40 thousand cranes roost simultaneously in the drained fishponds. The area can be visited on foot or by bike with a valid entrance card or by the narrow gauge train with a train ticket. Children can spend fun moments on our new playground.
